Work Experience

Registered Nurse – Home Health Care

Al-Mohand Home Nursing and Medical Equipment Establishment

July 2024 - Present

Amman - Jordan

Key Achievements:

- Provide comprehensive home nursing services to adult and geriatric patients with chronic illnesses, post-operative conditions, and palliative needs.
- Perform clinical assessments, wound care, medication administration, and vital sign monitoring in home environments.
- Manage diabetes, hypertension, and respiratory conditions using appropriate medical devices (glucometer, suction machine, CPAP/BiPAP).
- Educate patients and caregivers on disease management, medication adherence, infection control, and hygiene.
- Maintain accurate electronic and paper documentation to ensure continuity of care and compliance with quality standards.
- Collaborate with physicians, physiotherapists, and family members to ensure holistic patient outcomes.

Registered Nurse – Spinal Cord Injury & Burn Unit

Royal Rehabilitation Center

2015 – 2025 Amman - Jordan

Key Achievements:

- Delivered advanced nursing care to patients with spinal cord injuries, burns, and trauma within a multidisciplinary team.
- Conducted neurological assessments, monitored vital signs, and reported critical changes to attending physicians.
- Administered medications and advanced wound/burn care to promote healing and prevent infection.
- Supported rehabilitation programs, teaching patients to adapt to physical limitations and regain independence.
- Managed pain, respiratory complications, and pressure ulcers through evidence-based interventions.
- Ensured compliance with infection prevention protocols and maintained detailed patient progress reports.

Registered Nurse – Male Surgical Ward

Royal Rehabilitation Center

2009 - 2015 Amman - Jordan

Key Achievements:

- Admitted, assessed, and monitored post-operative and pre-operative patients.
- Performed wound dressing changes, pain management, and medication administration (IV, IM, oral).
- Collaborated with surgeons and anesthesiologists to ensure optimal patient care during surgical recovery.
- Educated patients and families on discharge instructions, wound management, and follow-up care.
- Maintained precise documentation of interventions and monitored infection control measures.
- Utilized Scully for static site generation.

Associate Nurse

Field Medical Clinics

2007 - 2009 Amman - Jordan

Key Achievements:

- Delivered emergency medical and trauma care in remote and high-stress environments.
- Performed rapid patient assessments, wound management, and stabilization for transport.
- Administered vaccines and medications according to approved protocols.
- Ensured sterilization and hygiene of medical instruments in field conditions.
- Collaborated with humanitarian units to provide healthcare in underserved areas.
