Sondos Marashdeh

Senior Software Engineer

Scan for portfolio

Passionate Software Engineer with nearly 4 years of hands-on experience building scalable, high-performance web applications using Angular, Spring Boot, JavaScript, and Java.
I'm driven by curiosity, a commitment to continuous learning, and a proven ability to turn complex ideas into effective, maintainable solutions. I thrive in dynamic, cross-functional teams and enjoy contributing to impactful, user-focused projects.

Skills

Frontend

Angular (Advanced), TypeScript, JavaScript (ES6+), NgRx, RxJS, HTML5, CSS3, SCSS, Bootstrap, WCAG, Scully, SEO, Dynamic Components, Cross-browser Compatibility

Backend

Java 8+, Spring Boot, Spring Batch, Spring Data JPA/Hibernate, Spring Scheduler, RESTful APIs, GraphQL, Security (JWT, RSA, SHA256), SQL (MySQL), Maven, Gradle

Dev Tools

Git, GitHub, Bash, Unit & Integration Testing, Open Source Contributor

Software Engineering

Problem Solving, OOP/Functional Programming, Algorithms, Design Patterns, Code Modularity, System Design, Agile/Scrum

Work Experience

Software Engineer (Angular + SpringBoot)

Bitoasis

09/2024 - Present

Amman - Jordan

Cryptocurrency exchange platform for BitCoin and +60 cryptocurrencies.

Key Achievements:

- Skilled in designing and implementing highly reusable Web Components. Proficient in using advanced component architectures to ensure code reusability and modularity using Angular.
- Collaborated with UI/UX teams to translate visual and interaction designs into functional user interfaces while maintaining high performance and scalability.
- Developed and maintained APIs using GraphQL, enabling flexible data fetching and minimizing over - fetching issues in client applications.
- Employed caching mechanisms and optimized SQL queries to enhance application performance and reduce load times.
- Developed and integrated APIs for third-party services, enhancing the platform's capabilities and user interconnectivity
- Led the shift to a mobile-first design approach, significantly improving user experience and engagement on mobile devices

Software Engineer (SpringBoot)

Eskadenia

03/2024 - 09/2024 Amman - Jordan

Software development company provides software in the fields of Telecommunications, Insurance, Enterprise, Education, Healthcare and Internet.

Key Achievements:

- Designed and developed RESTful APIS facilitating effective data exchange between the frontend interfaces and backend services.
- Engineered a scheduling system utilizing Spring Scheduler and Spring Batch to automate and manage data retrieval tasks from external APIs.
- Implemented Spring Boot's security and data access frameworks to ensure application integrity and efficient data management.
- Collaborated closely with JPA and Hibernate to design and implement code-first databases.

Software Engineer (Angular)

Eskadenia

12/2021 - 03/2024 Amman - Jordan

Software development company provides software in the fields of Telecommunications, Insurance, Enterprise, Education, Healthcare and Internet.

Key Achievements:

- Constructing a security layer that facilitates End-to-End encryption and decryption, coupled with the signing of HTTP requests. This layer employs the RSA and ESA algorithms for encryption and the SHA256 algorithm for signature hashing. It's characterized by the use of dual public and private keys, along with a unique authentication identifier for every user.
- Enhanced the flexibility and modularity of a large-scale CMS application by effectively using Angular's dynamic components, enabling on-the-fly content management and customization.
- Designed and implemented robust state management solutions, Using NgRx Store to manage the state of the application in a single, predictable state container, enabling easier debugging and state monitoring.
- Authored and Maintained Two Open Source Angular Libraries: - Ngx Lightbox Plus : Created an Angular library that extends the functionality of ngx-lightbox by adding video support, now used by developers globally. - Special Characters Picker : facilitate the insertion of special characters in web applications, contributing to the open-source community. [check personal projects for details].
- Guaranteeing cross- browser functionality and adherence to web content accessibility standards.
- Creating sitemaps and implementing SEO best practices to enhance website visibility and search engine ranking.
- Utilized Scully for static site generation in Angular applications, significantly improving SEO performance and reducing load times.
- Mentored junior developers, promoting best practices in code quality, documentation, and workflow management.

Projects

Work Projects

- **Bitoasis**

  A platform that allows you to securely buy, sell and trade cryptocurrencies.

  # https://bitoasis.net/en/home

- **CMS (Content Management system)**

  These projects built using our Angular team's CMS:

  # https://rosarycsh.edu.jo/
  # https://solidarity.com.jo/en/home
  # https://eskadenia.com/
  # https://runjordan.com/
  # https://www.amsa.com.jo/

- **Revenue Compliance and Verification System**

This system dynamically calculates the governmental fees owed based on declared revenues and cross-verifies these against submissions in a secure portal.

Communications and Media Commission, Iraq government

- **Online education platform**
  # https://anardes.net/new/indexenglish.php

Personal Projects

- **Ngx Lightbox Plus(NPM Package)**

  All the features of the original ngx-lightbox Package and Added video support.

  NPM Link: # https://www.npmjs.com/package/ngx-lightbox-plus
  Source Code Link: # https://github.com/ssondoss/ngx-lightbox-plus

- **Author of Special Characters Picker(NPM Package)**

  Picker for easy insertion and search of special characters, Developed and intend to integrate into my advanced text editor

  NPM Link: # https://www.npmjs.com/package/special-characters-picker
  Source Code Link: # https://github.com/ssondoss/specail-characters-picker

- **High Designing Skills(Talabat design)**
  Live Demo Link:
  https://amazing-clarke-3f5343.netlify.app

- **Sallatiy - Ecommerce website**
  http://sallatiy.com/

Education

Software Engineering - Bachelor's Degree
2017 - 2021
Excellent, Graduated with second rank

Nursing - Bachelor's Degree
2012 - 2016
Excellent

Languages

Arabic: Native or Bilingual Proficiency

English: Full Professional Proficiency
